

## **Oil Spill - Loss-of-business claims**

Businesses should keep detailed records of any business losses resulting from the oil spill. Businesses, including hoteliers, sport fishing charters, watersports rental companies, etc., that may be negatively impacted are asked to keep detailed profit and loss records and track any cancellations, should a claim need to be presented. BP has established a claim system and toll free number: **800-440-0858**. This system will allow people to be entered into a process to recover lost income or recoup damage-related expenses.
