<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

OTHER INFORMATION & Data (If Any)

PANAMA CITY, FL.

SECTION B  FLOOD INSURANCE RATE MAP (FIRM) INFORMATION

Provide the following from the proper FIRM (See Instructions)

<table>
<thead>
<tr>
<th>A. FIRM NAME NUMBER</th>
<th>B. RGN NUMBER</th>
<th>C. S.B.A.</th>
<th>D. DATE OF FIRM ISSUE</th>
<th>E. FIRM ZONE</th>
</tr>
</thead>
<tbody>
<tr>
<td>12062</td>
<td>0364</td>
<td>B</td>
<td>1-1-96</td>
<td>28.5</td>
</tr>
</tbody>
</table>

7. Indicate the elevation datum system used on the FIRM for these Flood Elevations (FBE): NGVD '62 Other (describe in back)

8. For Zones A or V where the FBE is preceded by the FIRM, and the community has established a FBE for this building, indicate the community's FBE: NGVD '62 Other (describe in back).

SECTION C  BUILDING ELEVATION INFORMATION

1. Using the Elevation Certificate Instructions, indicate the diagram number in the diagram figure on Pages 5 and 6 that best depicts the subject building's reference level.

2a. FIRM Zones A1, A2, V1, V2, and A (with FBE): The top of the reference level floor from the selected diagram is at or below (check one) the highest grade adjacent to the building.

2b. FIRM Zones V1, V2, and V (with FBE): The bottom of the lowest horizontal structural member of the reference level from the selected diagram is at or below (check one) the highest grade adjacent to the building.

3. FIRM Zone A (without FBE): The floor marked as the reference level from the selected diagram is at or below (check one) the highest grade adjacent to the building.

4. FIRM Zone AO. The floor used as the reference level from the selected diagram is at or below (check one) the highest grade adjacent to the building.

5. The reference level elevation is based on: Acc of construction

6. The elevation of the lowest grade immediately adjacent to the building is: 128.5 (NGVD or other FIRM datum see Section B, Item 7).

SECTION D  COMMUNITY INFORMATION

1. If a community is responsible for verifying building elevations, specify the reference level indicated in Section C, Item 4 as the "lowest floor" as defined in the community's floodplain management ordinance, the elevation of the building's "lowest floor" as defined by the ordinance is: 128.5 (NGVD or other FIRM datum see Section B, Item 7).

2. Date of the start of construction or substantial improvement:

FORM 21-37, MAY 93
REPLACES ALL PREVIOUS EDITIONS  
SEE REVERSE SIDE FOR CONTINUATION
ATTENTION: Use of this certificate does not provide a waiver of the flood insurance purchase requirement. This form is used only to provide elevation information necessary to ensure compliance with applicable community floodplain management ordinances, to determine the proper insurance rates for flood insurance coverage, or to support a request of Map Amendment or Revision (LOMA or LORM). Instructions for completing this form can be found on the following pages.

<td>0001</td>
<td>C</td>
<td>4-30-86</td>
<td>A-4</td>
<td>4.00</td>
</tr>
</tbody>
</table>

7. Indicate the elevation datum system used on the FIRM for Base Flood Elevations (BFE): NAVD 29. Other (describe on back)

8. For Zones A or V, where no BFE is provided on the FIRM, and the community has established a BFE for this building site, indicate the community's BFE: __________ feet NGVD (or other FIRM datum—see Section B, Item 7).

SECTION C BUILDING ELEVATION INFORMATION

1. Using the Elevation Certificate Instructions, indicate the diagram number from the diagrams found on Pages 5 and 6 that best describes the subject building's reference level. __________

2.a. FIRM Zones B1, A1, X, AE, and AR (with BFE): The top of the reference level floor from the selected diagram is at an elevation of __________ feet NGVD (or other). 

2.b. FIRM Zones VE, V, and AO (with BFE): The bottom of the lowest horizontal structural member of the reference level from the selected diagram, is at an elevation of __________ feet NGVD (or other). 

2.c. FIRM Zone A (without BFE): The floor used as the reference level from the selected diagram is __________ feet above or below __________ (check one). The highest grade adjacent to the building.

3. Indicate the elevation datum system used in determining the above reference level elevations (NGVD 29): Other (describe under Comments on Page 2).

4. Elevation reference mark used appears on FIRM: X Yes [ ] No (See Instructions on Page 4)

5. The reference level elevation is based on: [ ] actual construction [ ] construction drawings

(Note: Use of construction drawings is only valid if the building does not yet have the reference level floor in place, in which case this certificate will only be valid for the building during the course of construction. A post-construction Elevation Certificate will be required once construction is complete.)

5. The elevation of the lowest grade immediately adjacent to the building is: __________ feet NGVD (or other FIRM datum—see Section B, Item 7).

SECTION D COMMUNITY INFORMATION

1. If the community official responsible for verifying building elevations specifies that the reference level indicated in Section C, Item 1 is not the lowest floor as defined in the community's floodplain management ordinance, the elevation of the building's "lowest floor" as defined by the community is: __________ feet NGVD (or other FIRM datum—see Section B, Item 7).

2. State of the status of any construction or substantial improvement: __________
ATTENTION: Use of this certificate does not provide a waiver of the flood-insurance purchase requirement. It is for informational only to provide elevation necessary to ensure compliance with applicable community floodplain management ordinances, to determine the proper insurance premium rate, and/or to support a request for a Letter of Map Amendment or Revision (LOMA or LOMR). Instructions for completing this form can be found on the following pages.

6. RATE FLOOD ELEVATION

6.00

7. Indicate the elevation datum system used on the FIRM for State Flood Elevations (BFE): X NGVD 29 Other (describe on back)

8. For Zones A or V, where no BFE is provided on the FIRM, and the community has established a BFE for this building site, indicate the community's BFE: 1 short, 1 long feet NGVD (or other FIRM datum—See Section B, Item 7).

SECTION C BUILDING ELEVATION INFORMATION

1. Using the Elevation Certificate Instructions, indicate the diagram number from the diagrams found on Pages 5 and 6 that best describes the subject building's reference level.

2a. FIRM Zones A1-A30, AE, AH, and A (with BFE). The top of the reference level floor of the selected diagram is at an elevation of: [ ] feet NGVD (or other FIRM datum—See Section B, Item 7).

2b. FIRM Zones V1-V30, VE, and V (with BFE). The bottom of the lowest horizontal structural member of the reference level from the selected diagram, is at an elevation of: [ ] feet NGVD (or other FIRM datum—See Section B, Item 7).

2c. FIRM Zone A (without BFE). The floor level used as the reference level from the selected diagram is: [ ] feet above or below [ ] (check one) the highest grade adjacent to the building.

3. Indicate the elevation datum system used in determining the above reference level elevations: [X] NGVD '29 Other (describe under Comments on Page 3). (NOTE: If the elevation datum used in measuring the elevations is different than that used on the FIRM, use Section B, Item 7), then convert the elevations to the datum system used on the FIRM and show the conversion equation under Comments on Page 2.)

4. Elevation reference mark used appears on FIRM: [X] Yes [ ] No (See Instructions on Page 4)

5. The reference level elevation is based on: [X] actual construction [ ] construction drawings (NOTE: Use of construction drawings is only valid if the building does not yet have the reference level floor in place, in which case this certificate will then be invalid for the building during the course of construction. A post construction Elevation Certificate will be required once construction is complete.)

6. The elevation of the lowest grade immediately adjacent to the building is: [ ] feet NGVD (or other FIRM datum—See Section B, Item 7).

SECTION D COMMUNITY INFORMATION

1. If the community official responsible for verifying building elevations specifies that the reference level indicated in Section C, Item 1 is not the "lowest floor" as defined in the community's floodplain management ordinance, the elevation of the building's "lowest floor" as defined by the ordinance is: [ ] feet NGVD (or other FIRM datum—See Section B, Item 7).

2. Date of the start of construction: [ ] Substantial Improvement

(continued on back)
This certification is to be signed by a land surveyor, engineer, or architect who is authorized by state or local law to certify elevation information when the elevation information for Zones A1-A30, AE, AH, A (with BFE), VE, V1-V30, VE, and V (with BFE) is required.

Community officials who are authorized by local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community issued BFE), a building official, a property owner, or an owner’s representative may also sign the certification.

Refer to level diagrams 6, 7 and 8 - Distiguishing Features. If the certifier is unable to certify breakaway/non-breakaway wall, enclosure size, location of centering equipment, area use, wall openings, or unfinished area feature(s), then list the feature(s) not included in the certification under Comments below. This diagram number, Section C, Item 1, must still be entered.

I certify that the information in Sections B and C on this certificate represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code, Section 1001.

CERTIFICATION OF ELEVATION

W. Todd Tindall

License Number: 4958

Title: Land Surveyor

Company Name: Buchanan & Harper, Inc.

Address: 736 West 11th Street

City: Panama City

State: Florida

ZIP: 32401

Signature: 3/29/95

Phone: (904) 763-7487

Copies should be made of this Certificate for: 1) community official, 2) insurance agent/company, and 3) building owner.

COMMENTS:

The diagram(s) show illustrate the points at which the elevations should be measured in A Zones and V Zones.

Elevations for all A Zones should be measured at the top of the reference level floor.

Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.

7. Indicate the elevation datum system used on the FIRM for Base Flood Elevations (BFEs). a) NGVD 29 b) Other (describe on tack) a) For Zones F or V, where no BFE is provided on the FIRM, and the community has established a BFE for this building, indicate the community's BFE: [Blank]. (If other FIRM datum—see Section 6, Item 7)

SECTION C BUILDING ELEVATION INFORMATION

1. Using the Elevation Certificate Instructions, indicate the diagram number from the diagrams found on Pages 5 and 6 that best describes the subject building's reference level. 2(a) FIRM Zones A, AO, X, AH, and A (with BFE). The top of the reference level floor from the selected diagram is at an elevation of [Blank] feet NGVD (or other FIRM datum—see Section 6, Item 7).
   (b) FIRM Zones V1-V30, VE, and V (with BFE). The bottom of the lowest horizontal structural member of the reference level from the selected diagram is at an elevation of [Blank] feet NGVD (or other FIRM datum—see Section 6, Item 7).
   (c) FIRM Zone A (without BFE). The floor used as the reference level from the selected diagram is [Blank] feet above [Blank] or below [Blank] (check one) the highest grade adjacent to the building.

2. FIRM Zone AO. The floor used as the reference level from the selected diagram is [Blank] feet above [Blank] or below [Blank] (check one) the highest grade adjacent to the building. If no fixed depth number is available, use the building's lowest floor (reference level) elevated in accordance with the community's floodplain management ordinance. Yes [Blank] No [Blank] Downstairs

3. Indicate the elevation datum system used in determining the above reference level elevations. a) NGVD 29 b) Other (describe under Comments on Page 2). (NOTE: If the elevation datum used in measuring the elevations is different than that used on the FIRM, see Section 6, Item 7, then convert the elevations to the datum system used on the FIRM and show the conversion equation under Comments on Page 2.)

4. Elevation reference mark used appears on FIRM: [Blank] '93 No [Blank] (See Instructions on Page 4)

5. The reference level elevation is based on: [Blank] actual construction [Blank] construction drawings. (NOTE: Use of construction drawings is only valid if the building does not yet have the reference level floor in place, in which case this certificate will only be valid for the building during the course of construction. A post-construction Elevation Certificate will be required once construction is complete.)

6. The elevation of the lowest grade immediately adjacent to the building is: [Blank] feet NGVD (or other FIRM datum—see Section 6, Item 7).

SECTION D COMMUNITY INFORMATION

1. If the community official responsible for verifying building elevations specifies that the reference level indicated in Section C, Item 1 is not the "lowest floor" as defined in the community's floodplain management ordinance, the elevation of the building's "lowest floor" as defined by the ordinance is: [Blank] feet NGVD (or other FIRM datum—see Section 6, Item 7)

2. Date of the start of construction or substantial improvement: [Blank]

FEMA Form 81-3, MAY 93 REPLACES ALL PREVIOUS EDITIONS SEE REVERSE SIDE FOR CONTINUATION
This certification is to be signed by a land surveyor, engineer, or architect who is authorized by state or local law to certify elevation information when the elevation information for Zones A1-40, AE, AH, A (with BFE), V, VL, VE, and V (with BFE) is required. Community officials who are authorized by state or local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community issued BFE), a building official, a property owner, or an owner's representative may also sign the certification.

Reference level diagrams 8, 7 and 9 - Distinguishing Features: If the certifier is unable to certify to breakaway/not breakaway wall, encroachment zone, location of existing equipment, area use, wall openings, or unfinished area features, then list the feature(s) not included in the certification under Comments below. The diagram number, Section C, item 1, must still be entered.

I certify that the information in Sections B and C on this certificate represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S.C. Title 6, Section 1007.

Copies should be made of this Certificate for: 1) community official, 2) insurance agent/company, and 3) building owner.

COMMENTS:

The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones. Elevations for all A Zones should be measured at the top of the reference level floor. Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.

7. Indicate the elevation datum system used on the FIRM for Base Flood Elevations (BFE): [ ] NGVD 29 [ ] Other (describe on back)
8. For Zones A or V, where no BFE is provided on the FIRM, and the community has established a BFE for this building site, indicate the community's BFE: [ ] _______ [ ] _______ [ ] _______ [ ] _______ [ ] _______ (feet NGVD or other FIRM datum—see Section B, Item 7).

SECTION C BUILDING ELEVATION INFORMATION

1. Using the Elevation Certificate Instructions, indicate the diagram number from the diagrams found on Pages 5 and 6 that best describes the subject building’s reference level.

2. FIRM Zones A1-A30, AE, AH, and A (with BFE): The top of the reference level floor from the selected diagram is at an elevation of [ ] _______ [ ] _______ [ ] _______ [ ] _______ [ ] _______ feet NGVD (or other FIRM datum—see Section B, Item 7).

3. FIRM Zones V1-V30, VE, and V (with BFE): The bottom of the lowest horizontal structural member of the reference level from the selected diagram is at an elevation of [ ] _______ [ ] _______ [ ] _______ [ ] _______ [ ] _______ feet NGVD (or other FIRM datum—see Section B, Item 7).

4. FIRM Zone A (without BFE): The floor used as the reference level from the selected diagram is _______ [ ] _______ [ ] _______ [ ] _______ feet above _______ [ ] _______ [ ] _______ feet below _______ [ ] _______ [ ] _______ (check one) the highest grade adjacent to the building.

5. FIRM Zone A0. The floor used as the reference level from the selected diagram is _______ [ ] _______ [ ] _______ [ ] _______ feet above _______ [ ] _______ [ ] _______ feet below _______ [ ] _______ [ ] _______ (check one) the highest grade adjacent to the building. If no flood depth number is available, list the building’s lowest floor (reference level) elevation in accordance with the community’s floodplain management ordinance: [ ] Yes [ ] No [ ] Unknown

6. Indicate the elevation datum system used in determining the above reference level elevations: [ ] NGVD 29 [ ] Other (describe under Comments on Page 2). (NOTE: If the elevation datum used in measuring the elevations is different than that used on the FIRM, see Section B, Item 7, then convert the elevations to the datum system used on the FIRM and show the conversion equation under Comments on Page 2.)

7. Elevation reference mark used appears on FIRM: [ ] Yes [ ] No (See Instructions on Page 4)

8. The reference level elevation is based on: [ ] actual construction [ ] construction drawings (NOTE: Use of construction drawings is only valid if the building does not yet have the reference level floor in place, in which case this certificate will only be valid for the building during the course of construction. A post-construction Elevation Certificate will be required once construction is complete.)

9. The elevation of the lowest grade immediately adjacent to the building is: _______ [ ] _______ [ ] _______ [ ] _______ feet NGVD (or other FIRM datum—see Section B, Item 7).

SECTION D COMMUNITY INFORMATION

1. If the community official responsible for verifying building elevations specifies that the reference level indicated in Section C, Item 1 is not the “lowest floor” as defined in the community’s floodplain management ordinance, the elevation of the building's “lowest floor” as defined by the ordinance is _______ [ ] _______ [ ] _______ [ ] _______ feet NGVD (or other FIRM datum—see Section B, Item 7).

2. Date of the start of construction or substantial improvement: ...
This certification is to be signed by a land surveyor, engineer, or architect who is authorized by state or local law to certify elevation information when the elevation information for Zones A1-ASO, AE, AH, A (with BFIE), V1-V30, V, and V (with BFIE) is required. Community officials who are authorized by local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community issued BFIE), a building official, a property owner, or an owner’s representative may also sign the certification.

Reference level diagrams 6, 7, and 8: Distinguishing Features: if the certifier is unable to certify to breaking point/breakaway wall, endplate, or location of serving equipment, area, well-draining, or unfinished area (Features), then list the Feature(s) not included in the certification under Comments below. The diagram numbers, Section C, Item 1, must still be entered.

I certify that the information in Sections B and C on this certificate represents my best efforts to interpret the data available, I understand that any false statement may be punishable by fine or imprisonment under 16 U.S. Code, Section 1001.

Copies should be made of this Certificate for: 1) community official, 2) insurance agent/company, and 3) building owner.

COMMENTS:

The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones. Elevation for all A Zones should be measured at the top of the reference level floor. Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.

8. For Zones A or V, where no BFE is provided on the FIRM, and the community has established a BFE for this building site, indicate the community's BFE: 1.1 1.1 1.1 1.1 feet NGVD (or other FIRM datum see Section B, item 7).

SECTION C  BUILDING ELEVATION INFORMATION

1. Using the Elevation Certificate instructions, indicate the diagram number from the diagram found on Pages 5 and 6 that best describes the subject building's reference level:

2(a). FIRM Zones A-1-A30, AE, AR, and A (with BFE). The top of the reference level floor from the selected diagram is at an elevation of:

2(b). FIRM Zones V1-V30, VE, and A (with BFE). The bottom of the lowest horizontal structural member of the reference level from the selected diagram is at an elevation of:

3. FIRM Zone A (without BFE). The floor used as the reference level from the selected diagram is:

4. FIRM Zone A. The floor used as the reference level from the selected diagram is:

5. If the community official responsible for verifying building elevations indicates that the reference level indicated in Section C, item 1 is not the lowest floor as defined in the community's floodplain management ordinance, the elevation of the building's lowest floor as defined by the ordinance is:

6. If the community official responsible for verifying building elevations indicates that the reference level indicated in Section C, item 1 is not the lowest floor as defined in the community's floodplain management ordinance, the elevation of the building's lowest floor as defined by the ordinance is:

7. The elevation of the lowest grade immediately adjacent to the building is:

8. Elevation reference mark used on FIRM: X Yes X No (See Instructions on Page 4)

5. The reference level elevation is based on: X actual construction X construction drawings. See Note

(Note: Use of construction drawings is only valid if the building does not yet have the reference level floor in place, in which case this certificate will only be valid for the building during the course of construction. A post-construction Elevation Certificate will be required once construction is complete.)

8. The elevation of the lowest grade immediately adjacent to the building is:

SECTION D  COMMUNITY INFORMATION

1. If the community official responsible for verifying building elevations indicates that the reference level indicated in Section C, item 1 is not the "lowest floor" as defined in the community's floodplain management ordinance, the elevation of the building's "lowest floor" as defined by the ordinance is:

2. Date of the start of construction or substantial improvement:
This certification is to be signed by a land surveyor, engineer, or architect who is authorized by state or local law to certify elevation information when the elevation information for Zones A1-A30, AR, AH, A (with BF), V1-V30, VF, and V (with BF) is required. Community officials who are authorized by local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community-issued BF), a building official, a property owner, or an owner's representative may also sign the certification.

Reference level diagrams 6, 7, and 8 - Distinguishing Features - If the certificate is unable to certify to breakaway/non-breakaway wall, enclosure area, location of serving equipment, wet area, wall openings, or other non-compliance feature(s), then list the Feature(s) not included in the certification under Comments below. The diagram number, Section C, Item 1, must still be entered.

I certify that the information in Sections B, C, and E on this certificate represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S.C. Code, Section 1001.

CERTIFIERS NAME
Alfonso Turcikievicz

TITLE
Land Surveyor

COMPANY NAME
A.T. Surveying

ADDRESS
2204 W. 24th Street

CITY
Panama City

STATE
Florida

ZIP
32405

SIGNATURE
1-13-95

PHONE (904) 763-6471

Copies should be made of this Certificate for: 1) community official, 2) insurance agent/company, and 3) building owner.

COMMENTS:
NOTE: Concrete has not been poured at this time. Reference level floor elevation shown is top of form for concrete foundation.

The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones.

Elevation for A Zones should be measured at the top of the reference level floor.

Elevations for all V Zones shall be measured at the bottom of the lower horizontal structural member.
