1. For the Fiber Hardening Project will these sites be maintained by the same company who wins the bid to install them or are we bidding to maintain them as well? Example when someone cuts a fiber line digging a hole. **There is no maintenance component to this project after the point of partial or final acceptance (per FDOT Standard Specifications For Road and Bridge Construction Section 611-2)**
2. Where can I find the construction plans for the 23-05 911 Fiber Optics Hardening HMGP Project 4399-131-R Re-bid ? **There is not a conventional set of construction plans for this project. The procurement document 'stands on its own' to describe all work, materials, specifications, and requirements that are applicable to this project**

All respondents shall acknowledge receipt of this addendum by signing and submitting, with their bid, the addendum acknowledgement form included in the Bid package.
