Search Tools
The Search Box can be used to locate parcels, addresses, and roads. The results from a search provide basic information about a location and has options to reveal more detailed information about a feature and the surrounding area. Options are provided to open the Print function or to export the search result to a file.

Parcels (1 results)	
Parcel ID:	18145-000-000

Measure

Acres ▾

Measurement Result

Measure an area, length, or coordinate. Measurements will appear on PDF documents made using the Print function.

Draw

Drawing tools let you create basic shapes as well as placing text annotations which can be included in prints.

Extract Data

Select area: EXTRACT

0 layers selected   show layers

The Extract Data tool allows a user to select an area and target layers which are then exported in Shapefile format to use in their own mapping projects.

Print
