Application Approved By:____________________________, Permit Officer
This notice is to inform you that a driveway final inspection will be needed for your project if it is on a County road.

__________ New driveway - you will need to apply to the Engineering Department for a Driveway Permit for a new access to a County road.

__________ Existing driveway - the inspection is still required, but is free of charge.

__________ Private Drive – No permit or inspection is required

All questions regarding driveway permits and inspections should be directed to the Engineering Department at 248-8301.

**Electricity cannot be turned on**

**Until the driveway final inspection is approved and filed.**

I have read and understand the above,

Date
WIND-BORNE DEBRIS PROTECTION
AFFIDAVIT AND NOTICE

For the purpose of documenting the wind-borne debris protection method for the exterior glazing (windows) of the structure located at:

__________________________________________________________________________

I (print name)_________________________________________ attest to the following:

1) The structure is classified as an R-3 or R-4 occupancy 3 stories or less.
2) The building is within one mile of the mean coastal high water line.
3) Wood panels will not be used for the third story glazing protection.
4) None of the glazing to be protected exceeds 8 feet wide.
5) I have applied for a Building Permit under an exception to the required “Protection of Openings” found in the Florida Building Code. (R301.2.1.2 and 1609.1.2)

NOTICE: This is only an option for Groups R-3 and R-4 occupancies. The wording in section R301.2.1.2 is slightly different than that in section 1609.1.2 of the Building Code.

From 1609.1.2 FBC: Wood structural panels with a minimum thickness of 7/16 inch (11.1 mm) and maximum panel span of 8 feet (2438 mm) shall be permitted for opening protection in one- and two-story buildings classified as Group R-3 or R-4 occupancy. Panels shall be precut so that they shall be attached to the framing surrounding the opening containing the product with the glazed opening. Panels shall be predrilled as required for the anchorage method and shall be secured with the attachment hardware provided. Attachments shall be designed to resist the components and cladding loads determined in accordance with the provisions of ASCE 7, with corrosion-resistant attachment hardware provided and anchors permanently installed on the building. Attachment in accordance with Table 1609.1.2 with corrosion-resistant attachment hardware provided and anchors permanently installed on the building is permitted for buildings with a mean roof height of 45 feet (13 716 mm) or less where $V_{ase}$, determined in accordance with Section 1609.3.1 does not exceed 140 mph (63 m/s).

I understand and agree to all of the above,
